

"Applying world best information security practices at national level to assist the government in creating a safe and reliable environment for conducting business."

ISECA AT A GLANCE

Introduction...

ISECA was founded in 2003 as a non-profit professional organization uniting information security professionals. ISECA is devoted to serving the government in creating a safe and reliable environment for conducting business online. We aid the government in providing services to the society in a reliable and secure fashion.

Our core members include certified security consultants and auditors, researchers, IS managers and educators with a proven track record.

Vision

To establish ISECA as a trusted and prominent organization, representing and addressing the needs of all social and business-sector organizations that depend on a secure and reliable IT environment.

Mission

- to facilitate knowledge and information sharing among ISECA members
- to promote the highest quality of technical and ethical standards to the information security profession
- to promote and implement best practices in information security management
- to promote security awareness to the IT industry and general public in Bulgaria
- to be the de facto representative body of local information security professionals

Approach

To accomplish our mission we have focused on the following activities:

- Raising awareness across society by relevant media publications and focused events
- Educating parties dependent on Information Technologies through qualified training
- Facilitating Collaboration among stakeholders and uniting them in a dedicated community

Benefits

- Find effective solutions to your technical problems
- Take part in real IT security projects
- Gain continuous access to up-to-date information
- Get professional recognition
- Become an active member in shaping the future of IT technologies in Bulgaria

Membership

ISECA is a strictly professional organization of people with experience and deep insight into the field of information security. Join us to keep up-to-date and competitive in today's industry and to define the industry of tomorrow. ISECA provides you with the resources you need to continuously expand your competence and plan for a successful future.
